Full-Stack Software Engineer with 6+ years building, deploying, and scaling production web applications. Strong in React/Next.js, distributed API design, and AWS cloud architecture. Experienced owning systems end-to-end — performance, reliability, observability, and long-term maintainability. Hands-on practitioner of AI coding agents (Claude Code, Copilot, Cursor) as part of daily development workflows, using them to accelerate delivery..

Experience

Full-Stack Software Engineer — Sekady Capital

Fruitland, Idaho • 2021–2026

- **End-to-end ownership** of major product areas across the full stack, from design through production rollout, instrumentation, and long-term maintenance.
- **High-reliability API systems** — engineered REST/GraphQL integrations across distributed services, reducing integration failures and improving cross-service data consistency under load.
- **Performance & scalability** — tuned NoSQL and SQL models, optimized queries, improved caching, and strengthened CI/CD pipelines to support rapid growth and higher traffic volumes.
- **AI-accelerated development** — used Claude Code, Copilot, and custom LLM agents to speed development, improve test coverage, automate documentation, and enhance reliability.
- **Cloud-native architecture** — designed and maintained AWS-based infrastructure supporting distributed workloads, background processing, and scalable API services.
- **AI platform integration** — collaborated on architecture enabling LLM-powered workflows, custom AI agents, and cloud-native automation.

Behavioral Support Specialist — Developmental Concepts / CDAN Idaho

Boise, Idaho • 2014–2021

- **Data-driven program design** using daily behavioral logging and analysis.
- **High-pressure problem solving** using crisis-management techniques.

Information Technical Support — Galexis Technology

Pullman, Washington • 2013–2014

- **Infrastructure deployment** for mid-large organizations, supporting cloud-native and on-prem systems.
- **System reliability** through software installation, directory setup, and environment maintenance.
- **Network configuration** across diverse corporate environments.

Education

Full-Stack Development Certificate — CodeWorks

B.S. Virtual Technology & Design — University of Idaho

Human-Centered Design Certificate — Interaction Design Foundation

Technical Skills

Core Engineering

Python, Django-style backend patterns, Node.js, TypeScript, JavaScript, React, Next.js, Vue, HTMX, REST, GraphQL, PostgreSQL, MongoDB, NoSQL, SQL optimization (indexing, partitioning, read replicas, connection pooling)

Cloud & DevOps

AWS, Terraform, CI/CD pipelines, Docker, containerization, distributed systems, background processing (Celery-style patterns), observability (metrics, logging, tracing, alerting), production monitoring, scaling applications under load

AI Development

Claude Code, Copilot, Cursor, custom AI agents, LLM-powered workflows, AI-assisted development, MCP
